## INTRODUCTION

I am a second-year M.S. student at KAIST in the Data AI Lab, advised by Prof. Jaemin Yoo. My research focuses on machine learning, particularly graph neural networks, recommendation systems, and time-series modeling. I aim to develop data-centric AI methods that address complex real-world challenges by combining theoretical analysis with practical system design.

## EDUCATION

## SKILLS

---

**Languages** : Python, C, MATLAB

**ML Frameworks** : PyTorch, TensorFlow, Weights & Biases

**Tools** : Git, Figma, Adobe Premiere Pro

**Language Proficiency** : Korean (Native), English (Fluent)
